

Easily measure your individual bracelet size

Fit
 Actual size
 Shrink oversized pages
 Custom Scale: %

1. Print out the measuring tape on A4 paper format (210 x 297mm). Please make sure that the document is not scaled (printed at actual size with a scaling of 100%).

2. Cut out the the measuring tape on the left side.

3. Place the top of the measuring tape on your wrist, then wrap the tape around your wrist to determine how tight the bracelet should be.

4. When the measuring tape is in the correct position, mark or take note of the part where it overlaps. This should be your perfect bracelet size.

5. Please enter the determined size in centimeters at checkout.

DAVOSA is not responsible for incorrect printing or measuring.
 For size-adjusted bracelets, all removed links will be included with the watch allowing further adjustments if needed.

If you are unable to print this document to scale, you can use a shoelace, a piece of fabric or a strip of paper instead, mark it where it overlaps and then measure from starting point to end mark with a ruler.
